

SHIVAM KUMAR

Backend Developer | Java, Spring Boot

Greater Noida, Uttar Pradesh | +91 6209491018 | kumarshivam007123@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Backend Developer skilled in Java, Spring Boot, and Spring Security, with hands-on experience building and deploying secure RESTful systems. Delivered 35+ production-style REST APIs across two independently deployed cloud projects, implementing JWT authentication, role-based access control, Docker containerization, and cloud database integration. Strong fundamentals in OOP, DSA, and scalable API design; seeking a Backend Developer role to contribute production-ready code from day one.

EDUCATION

Noida Institute of Engineering & Technology, Greater Noida *Master of Computer Applications (MCA) — Pursuing, 2024–2026*
JLN College, Bihar *Bachelor of Computer Applications (BCA), 2020–2023*

PROJECTS

SecureEdu-API — Enterprise Student Management Backend *Java, Spring Boot, Spring Security, Hibernate, MySQL, Docker*
[GitHub](#) | [Live Demo](#) | [Swagger Docs](#)

- Built and deployed a secure RESTful backend with 15+ CRUD endpoints using Spring Boot, Spring Security, Hibernate, and MySQL, live in production on Render Cloud.
- Implemented JWT-based stateless authentication and Role-Based Access Control (RBAC) across 3 user roles, securing all protected API routes.
- Containerized the application with Docker and integrated SpringDoc OpenAPI 3 for interactive, self-documenting Swagger UI testing.
- Integrated custom UserDetailsService and BCryptPasswordEncoder for database-driven authentication and password security.
- Designed centralized exception handling using @RestControllerAdvice, standardizing error responses across all APIs.
- Validated all endpoints using Postman with Bearer Token authentication, ensuring reliable request/response behavior.

SmartHire — Job Management REST API *Java, Spring Boot, Spring Security, JWT, Hibernate, MySQL, Docker*
[GitHub](#) | [Live Demo](#) | [Swagger Docs](#)

- Built and deployed 20+ RESTful APIs for a job management platform covering job postings, candidate applications, and admin workflows, live in production on Render with a cloud-hosted Aiven MySQL database.
- Implemented JWT-based stateless authentication with Role-Based Access Control (ADMIN & USER), securing all protected endpoints.
- Designed a relational schema (User, Job, Application) with JPA/Hibernate and DTO-based architecture, modeling one-to-many relationships for scalable data access.
- Built advanced query features including job search, application-status filtering, pagination, and sorting for efficient data retrieval.
- Containerized the application with Docker and integrated Swagger/OpenAPI documentation with a public health-check endpoint for monitoring.
- Added global exception handling, Bean Validation, and an admin dashboard-statistics endpoint for real-time insights into job postings and applications.

TECHNICAL SKILLS

- Programming Languages: Java, C++, SQL
- Backend Technologies: Spring Boot, Spring MVC, Spring Data JPA, Hibernate, REST APIs, JWT
- Database Management: MySQL, Cloud Database Integration (Aiven)
- DevOps & Tools: Docker, Swagger/OpenAPI, Git, GitHub, Postman, Maven, Render (Cloud Deployment)
- Core Concepts: Object-Oriented Programming (OOP), DBMS, Data Structures & Algorithms (DSA), JDBC
- IDEs: VS Code, IntelliJ IDEA

CERTIFICATIONS

DevSecOps Basic Course *NIELIT Delhi & Kyndryl*

- CI/CD pipelines and software delivery lifecycle fundamentals, with hands-on AWS deployment exposure.

AWS Academy Graduate – Cloud Foundations *AWS Academy*

- Core AWS services including EC2, S3, IAM, and VPC.

Introduction to Cybersecurity *Cisco Networking Academy*

- Cyber threats, network security, and safe online practices including malware and phishing awareness.
